```
@State var color = Color.red
```

The color of the big circle will change according to which button you click

In our button, we assigned a new value into our color variable to change the color

```
Button(action: {
    color = Color.yellow
}, label: {
    Circle()
        .foregroundStyle(Color.yellow)
        .frame(height: 60)
})
```
