

So...

```
struct ContentView: View {  
    @State var color = Color.red
```

**‘color’ variable from ‘ContentView’ page with @State in front
defines the value of ‘color’ variable**

So...

```
struct ContentView: View {  
    @State var color = Color.red
```

**‘color’ variable from ‘ContentView’ page with @State in front
defines the value of ‘color’ variable**

In which,
