

Now we will see this!

```
// Navigation
NavigationLink {
    SecondView(color: Binding<Color>)
} label: {
    Text("Go to second page")
}.buttonStyle(.borderedProminent)
```

Editor placeholder in source file

Color variable doesn't have any value.

Now we will see this!

```
// Navigation
NavigationLink {
    SecondView(color: Binding<Color>)
} label: {
    Text("Go to second page")
}.buttonStyle(.borderedProminent)
```

Editor placeholder in source file

Color variable doesn't have any value.

We need to fill out the value with the data we wanted to pass.
