On our second page, create another big circle!

```
74    struct SecondView: View {
75
76        var body: some View {
77            VStack {
78                Circle()
79                    .foregroundStyle(Color.red)
80            }
81        }
82    }
```

What do we need to change and add here?

```
74    struct SecondView: View {
75
76        var body: some View {
77            VStack {
78                Circle()
79                    .foregroundStyle(Color.red)
80            }
81        }
82    }
```
