Now we will see this!

```
// Navigation
NavigationLink {
    SecondView(color: Binding<Color>)
} label: {
    Text("Go to second page")
}.buttonStyle(.borderedProminent)
```

🔴 Editor placeholder in source file

Color variable doesn't have any value.

We need to fill out the value with the data we wanted to pass.

Yes, color variable that belongs on the first page!

```swift
// Navigation
NavigationLink {
    SecondView(color: $color)
} label: {
    Text("Go to second page")
}.buttonStyle(.borderedProminent)
```
